

nimblevox engine

Product Sheet

Overview

The Nimblevox Engine enables you to develop cutting edge communications applications. The Nimblevox Engine is cloud ready and can be hosted in our cloud or your cloud. Deploy your custom IVR application with the Nimblevox Engine and accelerate your time to market with IVR solutions that make business critical processes happen.

The Nimblevox Engine handles media resources such as voice, DTMF, and video. With inherent SIP and VoIP capabilities, the Nimblevox Engine provides enhanced media handling for large conferencing, audio streaming, and most importantly provides a development environment that allows you to make changes quickly and reliably.

Product Description

Ideal for any automated inbound and outbound services, the Nimblevox Engine allows you to manage and develop applications easily via a web based administration console, while the VoiceXML/CCXML interpreters that come standard with the Nimblevox Engine allow for ease of portability.

Features

VoiceXML/CCXML

- VoiceXML 2.1 compliant
- Accelerates market adoption for speech-enabled applications worldwide
- Assures interoperability across platforms, tools and application

Service Creation Environment

- Out of the box drag & drop functionality
- Menus, Call Control, and Conferencing are just a few clicks away
- Deploy into market at the touch of a button

Speech Engine

- Comes standard with Lumenvox's award winning speech engine
- Includes ASR/TTS/CPA/AMD
- Support for multiple languages

Outbound Dialer

- Outdial campaign solution using DTMF and ASR
- Quickly set up successful outbound calling campaigns using the web based interface
- Upload calling lists using .csv file
- Prescheduled or on-demand campaigns
- Customer opt-out options

Performance

- Up to 200 CPS, and up to 1400 channel capacity (32 bit)
- Cost savings of requiring fewer ports to power your voice solution

Benefits

Redundancy

The Nimblevox Engine is capable of providing real-time replication and failover, which provides the highest level of reliability. The systems can be sold stand alone, redundant, or in an N+1 configuration.

Flexible Deployment Options

Cloud

- Host your voice application at www.nimblevox.com
- Service Creation Environment
- Voice Channels (Service Providers can bring their own)
- ASR, TTS, AMD
- Preconfigured with optional award winning Lumenvox speech engine

Download

- Download at nimblevox.com/engine
- 2 step setup and configuration
- Service Creation Environment
- Linux 32 / 64 bit
- Perpetual per port pricing
- Monthly per port rentals
- Preconfigured with optional award winning Lumenvox speech engine

Server

- Pre configured and ready to go
- 200-1200 ports / node
- Service Creation Environment
- Server pricing per port or unlimited
- Preconfigured with optional award winning Lumenvox speech engine
